Section 1 Leather Interiors

Leather Interiors

Alea Leather Specialist is a global manufacturer and distributor of premium leather seat kits for the automotive industry. Alea works in close partnership with Gruppo Mastrotto SPA of Italy as we only use the finest Italian leather. Our vision is to become the market leader in supplying leather upholstery to customers who appreciate the highest quality, value, on-time delivery, and design flexibility.

To supply the best quality leather interiors to our customer, we source the highest quality Italian leather hides, adhere to paramount quality management system of TS-16949, and manufacture with the finest workmanship. Through our hard work, creativity, and most importantly our vision, Alea has taken the lead in revolutionizing the aftermarket custom leather seat covers. The Alea leather interiors are uniquely designed to evoke personality and inspire personalization.

Alea is now at the forefront of the industry in delivering the most stunning automotive leather interiors. No longer must you settle for a plain, basic, and dull leather interior. Get your start in the Alea Leather Design Studio. Simply select from either our Italian Verona or Nappa leather lines, and start designing your interior with over 100 exclusive customized designs. With Alea Leather, you truly make your interior one of a kind, no matter the year, make, or model.

Alea Leather Design Studio. Simply select from either our Italian Verona or Nappa leather lines, and start designing your interior with over 100 exclusive customized designs. With Alea Leather, you truly make your interior one of a kind, no matter the year, make, or model.

Choose from:

Factory Match

Part # 2ALSFM0511 for 2 rows
 Part # 3ALSFM0551 for 3 rows
 Factory match means the leather will match the original recommended color and style the vehicle is equipped with and is made with Verona Leather. This may include contrast stitching and perforated inserts. This style is usually pre-made and is available immediately

or

Customize your interior

Alea offers over 100 exclusive customized designs. More than any other supplier on the market. With that in mind, the installation price will be determined on what style is selected.

Leather Interiors

HIGH-QUALITY LEATHER SEAT UPHOLSTERY

These are more than just regular leather car seat covers. Katzkin cloth replacement leather interiors completely transform the look and feel of your entire vehicle. Our professional installers will remove the cloth from your front and rear seats and replace it with your new Katzkin interior. As a general rule: if it has cloth on it, we replace it.

At Katzkin, we've been manufacturing the best ready-to-install automotive upholstery in the US for nearly 40 years, and we're proud to stand by our work. We back up all our interiors with a national 3-year/36,000-mile warranty and a guarantee that your leather seats will meet or exceed the fit and finish of factory leather. When you choose Katzkin, you're not just getting high-quality leather seat upholstery, you're getting peace of mind that'll last for years.

Imagine your car with a luxurious, premium leather interior. Maybe you've wanted a custom car interior but thought it was really expensive. Or you didn't know that you could easily upgrade your cloth seats to custom car seats on the car you have now. Whatever your dream, Katzkin can deliver it, adding luxury, comfort and style to your vehicle at an affordable price.

Seat Comfort Systems

AUTOMOTIVE SEAT HEATING & COOLING
DegreeZ™
by **katzkin®**

WHETHER THE WEATHER is **HOT or **COLD**, DegreeZ has got you covered**

- 3 Levels of Heating
- 3 Levels of Cooling
- 1 Simple Switch

DegreeZ is a complete **OEM-quality** climate control system for your seats. Heating is fast and evenly distributed. And the cooling is more than just a fan blowing ambient air around; **active cooling technology** actually reduces the temperature of the intake air by as much as 15 degrees. **Driving comfort has never been this convenient.** With DegreeZ by Katzkin you're going to **LOVE YOUR DRIVE!**

katzkin®
AUTOMOTIVE LEATHER
Love Your Drive®

36 month / 36000-mile limited warranty

Part # DEGREEZ0511

- Can be added to factory perforated leather
- Can be added to aftermarket perforated leather upgrade.
- Not available on all vehicles. Some vehicles have occupant airbag sensors on the passenger seat that prohibit the install of this system – call for availability.

Seat Comfort Systems

Universal Round Switch Seat Heater System

- Best in warmth and comfort.
- Seat Heaters can be added to existing factory cloth and leather seats.
- Heated seats can be added to the rear passenger seats on most vehicles.
- Carbon fiber heating elements.
- Industry's safest technology.
- Same technology utilized by most OEMs.
- Most efficient and balanced heat.

Important Note

Seat Heater Pads are installed on the lean back and cushion. Some vehicles prohibit a heat pad on the passenger cushion/lean back because of the airbag sensor. In this situation a pad may only be applied to the bottom or back but not both.

Part # URSSH572 for individual

Part # 2URSSH054 for pair

Cold day chills and long drive fatigue can be a thing of the past, when you have seat heaters installed in your vehicle.

Safe, reliable and easy to use line of seat heaters will keep you warm and cozy. Available for install on both factory cloth seats and of course with leather interior.

Seat heaters also provide excellent therapeutic relief to heat benefitting back problems.

Power Lumbar

Part # PLSSA022

Cruise in comfort! With a Power Lumbar Support System, you can set the amount of lower back muscle support you need for your individual comfort while driving. Tucked away inside the driver or passenger seat, the Lumbar Support System provides the precise amount of extra lumbar support to your lower back, decreasing lumbar strain at your command. With just the touch of a finger, the seat or console-mounted switch activates a pneumatic motor filling the bladder within the seat. Make every drive a comfortable drive.

Section 3 Advanced Driver Assistance Systems ADAS

Bluetooth

ADAS

Con-verse Automotive Bluetooth

Part # ROSBTA574

Good driving requires two hands! Rostra is proud to introduce an innovative product that is going to change the way you use your cellular phone while driving. The Con-Verse Automotive *Bluetooth*® Handsfree System by Rostra allows you to keep both hands on the wheel while driving, keeping you alert and aware of your surroundings, ready to react without any distractions.

About The Con-Verse Bluetooth® Product Line

The Con-Verse Bluetooth® system is available from Rostra in both [vehicle-specific kits](#) that offer plug-and-play compatibility with your factory audio system, or as a 2-channel universal system that can be wired directly to the speakers of any car, truck, or SUV including hot rods and custom classic vehicles. Vehicle-specific and universal systems include our universal flat black surface-mount control switch. All Rostra Bluetooth® control switches include an attractive blue LED backlighting that makes them easy to locate in low light environments while matching the factory fit and finish of your vehicle.

A full system dedicated to conversation and music in car. Blue OLED 2 lines Screen Made for iPod & Works with iPhone

- Bluetooth hands-free system with OLED screen.
- Dual Mode (MULTIPOINT) : simultaneous connection with 2 Bluetooth phones
- Automatic phonebook synchronization
- Speaker-independent voice recognition
- Connectivity: iPod / iPhone, USB, line-in, Bluetooth (A2DP).

How Does the Con-Verse Bluetooth® System Work?

The Con-Verse Bluetooth® system was designed from the ground up to make interacting with your mobile device less of a distraction while driving by keeping your hands free and your eyes on the road. A Con-Verse system interfaces with the factory audio wiring harness on your vehicle to automatically mute the sound coming from your radio and replaces that sound with audio streaming from your phone or other Bluetooth-equipped device. The Con-Verse system will stream multiple types of audio including telephone calls, music, podcasts, sounds from videos, voice-guided navigation directions and so much more! Once audio from your device stops streaming, like when you end a phone call, the radio will begin playing through the vehicle's speakers again. And once paired with the Con-Verse Bluetooth® module, your phone will connect automatically each time you start your vehicle.

Answering a Call Without Con-Verse Bluetooth®

When your cell phone rings alerting you to an incoming call while driving, the process of answering or rejecting the phone call can be a dangerous and potentially costly ordeal considering the road in front of you needs your undivided attention - if you can even hear the phone over the sound of your radio. You'll first need to take your eyes off the road to find your phone. Once in-hand, you'll still be required to look at the phone to unlock the screen and answer the call. Depending on the size of your phone's screen, this process might take two hands leaving you further distracted and in less control of your vehicle. Once the call is answered, you're now driving with your attention divided between the phone call, other vehicles on the road, and the physical act of holding the phone to your ear which both decreases peripheral vision and limits your side-to-side head-turning ability. All of this combines to make the road less safe for yourself and others driving near you.

Answering a Call With Con-Verse Bluetooth®

Now compare the experience above with having a Con-Verse Bluetooth® system installed in your vehicle. When your mobile device is paired with the Con-Verse Bluetooth® module, every time your vehicle is started, the phone will connect automatically. While driving, an incoming phone call will automatically mute the radio in the vehicle and play the ringtone from your phone over the vehicle's speakers. With a quick press of the *Answer Key* on your Con-Verse control switch (the phone icon in the picture to the right), you can answer the call (**Note:** holding down the *Answer Key* will reject the phone call). If you've chosen to answer the call, the voice of the person on the other end of the line will play through the vehicle's speakers while you can respond through the Con-Verse microphone (included with every system). With the Con-Verse system, you're able to have a conversation while driving and keeping both hands safely on the wheel. As well, the included Con-Verse control switch has a built-in blue LED backlight so that it's easy to locate while driving at night.

And Phone Calls Aren't All You Can Do With Con-Verse Bluetooth®

While a Con-Verse Bluetooth® system is a hugely convenient alternative to removing your hands from the steering wheel of your vehicle to make or receive a phone call, Con-Verse also makes accessing the entertainment multimedia on your phone a breeze. Because the Con-Verse system will stream audio through all your vehicle's speakers, music stored on your phone or streamed through cloud-based services like Apple Music, Spotify, Pandora, or Google Play Music comes through loud and clear providing a great personal soundtrack to your driving. And while the Con-verse control switch mentioned above allows you to answer or reject calls, the *Up* and *Down* arrows of the control switch allow you to adjust the volume of the music as well as skip forwards or backwards through your music, so you have complete control without ever touching your phone.

But That's Not All - Hey Siri

Owners of Apple iPhones have no doubt gotten accustomed to interacting with Siri. The iPhone's built-in intelligent personal assistant provides quick access to myriad services including voice-guide navigation, reading and responding to text messages, searching for local businesses, getting sports scores and more. With Con-Verse Bluetooth® drivers now have access to all that Siri offers without having to touch their iPhone or the Con-Verse control switch.

With the iPhone, if the *Hey Siri* feature is turned on in the Settings menu (Settings>General>Siri>Hey Siri), all a driver needs to do is speak the phrase "Hey, Siri" and they can begin giving instructions to the iPhone.

Standard Auto-Dim Mirrors

GENTEX REAR-VIEW MIRROR

Digital Rear View Mirror / Cameras

2021-2023 GM® Full-Size SUV Factory OEM Digital Rear View Camera Mirror Full-LCD Display For Tahoe Suburban Yukon Escalade

Part #GCAMY21SUV0571

Do you own the all-new 2021+ Chevrolet Tahoe / Suburban, GMC Yukon, or Cadillac Escalade and want to take advantage of the innovative factory GM rear camera mirror? The Rear Camera Mirror (option code DRZ) uses a dedicated camera which is built into the license plate lamp assembly to provide you a wide and less obstructed view behind the vehicle while you're driving. Drivers will still have the capability to switch between the camera view and a traditional rearview mirror.

- Vehicles equipped with the original mirror featuring OnStar buttons, upgrading to this Digital LCD Mirror will result in the loss of OnStar service. However, for SUVs with OnStar buttons located on the overhead console, this does not apply.
- The optional camera washer is included but will only work if the hose is connected to the existing rear window washer system. Custom parts and install labor would be required.

2019-2024 Chevrolet Silverado Or GMC Sierra Factory OEM Backup Rear Camera LCD Mirror for Trucks Not Equipped with the Rear Cargo Camera Feature

Part #GBDLCAMCHMSL0551

2019-2024 Chevrolet Silverado Or GMC Sierra Factory OEM Backup Rear Camera LCD Mirror for Trucks Equipped with the Rear Cargo Camera Feature

Part #GBDLCAMCHMSLUVN0081

Do you own the all-new Chevrolet Silverado or GMC Sierra full-size truck and want to take advantage of the innovative factory GM rear camera mirror? The Rear Camera Mirror (option code DRZ) uses a dedicated camera which is built into the 3rd brake lamp assembly to provide you a wide and less obstructed view behind the vehicle while you're driving. Drivers will still have the capability to switch between the camera view and a traditional rearview mirror.

If your truck is currently equipped with the cargo bed camera "RPO Code: UVN: Vision Cargo Bed Mono, HD Digital" be sure to select it within the drop down above so you retain that camera when performing this upgrade.

Digital Rear View Mirror / Cameras

Jeep Wrangler JK JL / Gladiator JT Digital Rear View Mirror LCD Display

Part #CCAMMIRJEEP057

This versatile new safety and convenience aid replaces your current rearview mirror with a full HD video screen. It improves on your traditional mirror by providing a clear, crisp view of exactly what you need to see with no obstructions of passengers, cargo or small rear windows. It comes with unbeatable features and a commitment to driver peace of mind. This plug & play upgrade kit is designed for 2018+ Wrangler JL, 2020+ Gladiator JT, and 2007-2018 Wrangler JK vehicles.

Cruise Controls

Part #2501223S054 Auto Transmissions

Part #2501223S005 Manual Transmissions

Set your speed with a touch of your finger! Once selected, your cruise control constantly measures changes in the engine loading and vehicle speed in order to maintain a constant speed on the highway. Easily set the controls and avoid unintended speeding. Slow down or accelerate, you don't have to touch the pedal.

Available on most automatic and manual transmissions.

Check for compatibility.

Blind spot detection

Blind Spot Detection systems are equipped with interior LED indicators for audio and visual alerts that are activated with rear cross traffic feature which senses vehicles approaching while in reverse as well as vehicles, people or objects entering the blind spot of the vehicle.

Blind Spot Detection 3.0 is equipped with interior LED indicators for audio and visual alerts that are activated with the new added overtaking feature which alerts when the equipped vehicle passes another vehicle, rear cross traffic feature which senses vehicles approaching while in reverse as well as the standard vehicles, people or objects entering the blind spot of the vehicle.

Part # ACABSD009

- New overtaking alert – alerts when equipped vehicles pass another vehicle
- Standard driving blind spot alerts are shown when other vehicles, people or objects enter the blind spot of the vehicle
- Equipped with rear cross traffic which alerts the driver of vehicles approaching from the left or right while in reverse
- Blind spot radar sensors located behind the bumper for simplified professional installation
- Blind spot speed activation at 15MPH via built-in GPS technology
- Audible & visual LED indicator alerts
- Waterproof IP67 rated
- 3-year warranty

Park Assist Rear Bumper Sensor Systems

Part #PSDBSN583

This system is an OEM grade ultrasonic parking sensor system. This system has mounting options for plastic & metal bumpers and amplified analog sensors with a digital electronic control module for best-in-class performance.

- (4) four flush mount paint-able ultrasonic sensors
- Rubber insulator sensor sleeve for metal bumper application
- High sensitivity – detects large obstacles up to 60” behind the vehicle
- Control module with advanced firmware
- Audio alerts
- Digital triangulation of static objects
- Automatic detection and bypass of vehicle mounted objects like trailer hitches and spare tires

Front Mount Parking Assistance System

Part # PSDFSN583

Designed to give every driver peace-of-mind while parking their vehicles in cramped quarters. The system provides audible alerts to the potential dangers of nearby obstacles with an included buzzer and engages automatically when the vehicle is traveling at low speeds.

List

Part # CDHS0051

Advent is delivering more choices in device connectivity, more capability to enhance entertainment and more value than ever before. Our new Headrest systems incorporate certified PHDMI inputs that give the user direct connection to any HDMI enabled device: smartphones, tablets, even Smart-TV devices. This provides delivery of high-definition audio and video content without losing the use of the DVD. That's smart, and it makes the entertainment possibilities literally endless.

- Color, material, grain pattern, stitching, piping - are all custom tailored.
 - Headrest bun shapes and assemblies are designed to match the factory headrests.
 - Solid frame construction ensures stability; posts are notched to factory spec.
 - Elegant & cleanly designed monitors are securely fastened to headrest.
 - Advanced electronics, picture & sound rival much higher priced systems.
 - Plus... a variety of flexible configurations fit all needs and budgets - Dual DVD, Single DVD/Single Monitor, Dual Monitors, etc.
- With a best-in-class headrest system fully customized by Advent, get ready for rear seat entertainment that's heads above the rest.

- Headrest monitors with 8" digital LED back-lit panels
- DVD players play DVDs in both monitors
- USB reader with charging in both monitors
- Hideaway HDMI input (6' extension cable w/finished connector Included)
- Resolution (800 x 480 RGB)
- Adjustable viewing angles
- A/V Input & Output
- RF Output for hard-wired FM modulator connection (FMDIRB required)
- USB input with charging
- Dual channel wireless headphones
- Full band FM transmitter
- 2 Remote controls included with hidden away junction box

Rear Seat Entertainment Systems

Overhead Entertainment Systems

Section 7 SiriusXM add-on

SiriusXM Satellite Radio System

Part # USXM574

If your car didn't come equipped with SiriusXM built-in, don't worry, we've got you covered. Our adapter is the perfect solution to bring the world of SiriusXM Satellite Radio into your vehicle. With this innovative system, you can enjoy all the benefits of SiriusXM radio without having to purchase a new car or replace your factory radio.

Your car didn't come with SiriusXM? You CAN add it!

Adding satellite radio to your vehicle doesn't mean you have to throw away your factory stereo.

Preserve the factory controls

Using our adapter means you can use factory radio and steering wheel controls to select channels and presets

Channel info just where you need it

Displaying channel information on the factory radio is convenient and eliminates unnecessary distractions

You deserve a clean dashboard

This system is installed out of sight and behind panels to preserve factory look. We connect to your radio via USB media port

Adding SiriusXM to your Factory Radio requires the radio to have the ability to play media and a media USB hub
